SUMMARY

I graduated from Gebze Technical University in 2020 as Electronic Engineer. I done my military service as reserve officer. After military service, I have decided to be a software developer and since 2022, I have studied web developer requirements. My web projects that I developed through online courses can be found on my github account.

SKILLS

- JavaScript
- Python
- HTML
- CSS
- Sass
- React.js
- Typescript
- NoSQL
- MongoDB
- SQL

LANGUAGES

- English B2
- Turkish Native

PROJECTS

Breakout Game
In FPGA course, I have developed this game using UART communication protocols and C language.

Arduino Car
As graduation project, I developed a car that can be controlled via phone app. The car calculates gas level, humidity, temperature and air pressure of environment.

Natours
Through a online course, I developed a website that contains fake nature tours on different locations on world. The tours can be bought, reviewed and advised to other users on website.

EDUCATION

GEBZE TECHNICAL UNIVERSITY
Electronic Engineering
2014 - 2020
